

T. GURU HEMANTH

DEVOPS ENGINEER | AWS | AZURE | KUBERNETES | DOCKER | TERRAFORM | CI/CD

Email: guruhemanth0@gmail.com | Phone: +91 7993393713 | Location: Chennai, India | LinkedIn: [linkedin.com/in/guruhemantht](https://www.linkedin.com/in/guruhemantht) | GitHub: github.com/guruhemanth

PROFESSIONAL SUMMARY

DevOps Engineer with 3 years of production experience across cloud infrastructure (AWS/Azure), Kubernetes, Docker, Terraform IaC, Jenkins CI/CD, and Linux automation. Proven track record in standing up reproducible cloud infrastructure, automating deployment workflows (slashing release cycles by 80%+), zero-downtime patch rollouts, telemetry monitoring, and enterprise 2FA security.

TECHNICAL SKILLS

Cloud Platforms:	AWS (EC2, VPC, EKS, RDS, S3, IAM, CloudWatch, ELB, ECR); Azure (AKS, ACR, Virtual Networks, NSG, VMSS)
DevOps & IaC:	Terraform, Ansible, Docker, Kubernetes (AKS/EKS), Helm, Jenkins, GitHub Actions, CI/CD Pipelines, Git
Scripting & Web:	Python, Bash Shell Scripting, JavaScript (Node.js, Express), SQL, Nginx Reverse Proxy, Socket.io
Databases & OS:	PostgreSQL (High-Availability, PL/pgSQL Triggers), OracleDB (HA Clusters), Linux (Ubuntu, RHEL, Fedora)
Monitoring & Security:	Prometheus, Grafana, AWS CloudWatch, ELK, Burp Suite, Wireshark, JMeter Load Testing, JWT, Bcrypt, Bandit

PROFESSIONAL EXPERIENCE

Axonbloom | *DevOps Intern* Remote | June 2024 – July 2024

- Infrastructure as Code:** Provisioned AKS cluster, private ACR, VNet with NSG firewall, and SSH Jumpbox using modular Terraform IaC with AcrPull managed identity for credential-less image pulls and ProxyJump tunneling to private nodes.
- CI/CD & Microservices:** Engineered a 5-stage Jenkins pipeline automating Docker builds, versioned ACR pushes, and rolling K8s deployments for a two-tier microservice architecture — reducing release cycles from 30+ minutes to under 5.
- Production Troubleshooting:** Resolved 6 production-blocking issues including ACR ImagePullBackOff, Azure region capacity constraints, and VMSS SSH key propagation via VMAccessForLinux extension.

Odyssey Technologies | *Junior Executive, Solution Support* Chennai, India | July 2024 – May 2026

- Automation & Telemetry:** Automated deployment workflows and 24/7 server health telemetry via Bash scripts, reducing deployment turnaround by 40% and manual errors by 95% across 30+ client environments.
- Disaster Recovery & Patching:** Developed DC-DR switchover validation and automated patch deployment scripts with integrated rollback capability, minimizing downtime and switchover operational risks.
- Security & API Integration:** Conducted 50+ application security assessments (Burp Suite, Wireshark) and JMeter load tests (10k+ users), slashing incidents by 60%; integrated enterprise REST APIs with JWT auth for 50k+ daily transactions.

Odyssey Technologies | *Trainee Engineer* Chennai, India | June 2023 – June 2024

- 2FA Reverse Proxy & HA:** Configured and administered enterprise clustered 2FA reverse proxy architectures and load balancers to ensure high availability and throughput optimization during peak traffic loads.
- Enterprise Migration & DB Ops:** Successfully migrated 200,000+ 2FA enterprise users from legacy systems to a modernized platform with 100% data integrity and zero defects; maintained production OracleDB multi-node cluster failover.

KEY TECHNICAL PROJECTS

Secure Banking Cloud-Native Migration | *AWS & Kubernetes* 2024

- Progressive Cloud Migration:** Architected a 4-stage progressive migration (Docker Compose → EC2 → EC2 + RDS → AWS EKS Cloud-Native) for a Python Flask REST API with isolated Multi-AZ RDS PostgreSQL.
- Automated IaC & Security Pipeline:** Provisioned AWS VPCs, IAM least-privilege roles, and EKS nodes via Terraform; built a 7-stage Jenkins pipeline with SAST (Bandit), linting, dependency auditing, and Ansible fleet configuration.

Multi-Tenant Real-Time Event & Fund Audit Platform | *Full-Stack & DevOps* 2026

- Multi-Tenancy & Real-Time Sync:** Architected a multi-tenant workspace platform with Socket.io room partitioning, JWT bcrypt auth, and automated PL/pgSQL database triggers logging immutable before/after JSONB audit snapshots.
- Containerization & Quality Assurance:** Containerized the stack with multi-stage Docker builds (Vite builder → Nginx Alpine runtime) and Docker Compose; built an automated 34-test integration suite (100% pass rate).

EDUCATION

Panimalar Institute of Technology, Chennai — B.E. in Electronics & Communication (CGPA: 8.54 / 10)	2019 – 2023
Srichaitanya Junior College — Intermediate (B.I.E.) (CGPA: 8.73 / 10)	2017 – 2019
